A.D. 1858, 3rd FEBRUARY. N^o 199.

Manure.

(This Invention received Provisional Protection, but notice to proceed with the application for Letters Patent was not given within the time prescribed by the Act.)

PROVISIONAL SPECIFICATION left by the said Leon Salles de la Magdeleine at the Office of the Commissioners of Patents, with his Petition, on the 3rd February 1858.

I, LEON SALLES de la MAGDELEINE, Gentleman, of Paris, (France,) do
5 hereby declare the nature of the said Invention for “AN IMPROVED MANURE”
to be as follows:—

The Invention consists in a liquid manure, in which the grain or seeds are
to be steeped before sowing them, or with which the plants may be watered;
the same is composed of common salt, desiccated night soil, or other animal
10 dung reduced to a fine powder, water of ammonia, and ashes from wood, peat,
or other vegetable matters, the entire mixed up with a suitable quantity of
water so as to form a liquid, in which the grains or seeds are to be steeped
before sowing them, or with which the plants may be watered.
